HOW DID YOUR WEEK WITH
SPIRIT GO?

16th Gene Key: Magical Genius

As an aspect of the Codon Ring of Prosperity, this Gene Key is about excellence. To prosper truly in the world is to find the one thing in life at which you excel above all others.

This is the true destiny of every human being...

P111

So how do you
know, really...

What that one
thing is...that
thing your SOUL
came to express?

In some ancient esoteric traditions, it was taught that as the SOUL came into the lower planes of the Earth plane, it would pass through what was known as The Seven Heavenly halls. These were bands in the field that had the vibration of each Planet. As the soul passed through on its way to Earth it would receive a specific frequency from each band.

Today we study astrology to learn more about ourselves, but this is based on the planet's place in the sky when we were born and tends to be focused on our personality in this lifetime and our life plan.

Turns out, there is actually a way to figure out what our SOUL had in mind from our birth chart as well...

In the book, The Invisible Garment, Connie Kaplan introduces us to a new way to use our astrology charts to give us a deeper insight into this question. She weaves together 30 Spiritual Principles that make up the Fabric of Human Life and shows us how to determine what our SOUL had in mind.

She states that,

“The first thread in your pattern, the Sun, tells us your primary reason for coming into an incarnation. According to the transmission she received, you came here delivering a specific gift sent into form from the level of human soul. The Sun’s principle, in specific, asks the practitioner to contemplate their purpose for embodying this time...Our Sun is the source of life on this planet, and for that reason, the Sun’s placement in the heavens at the moment of birth is one’s most significant marker of life. The degree of your Sun tells us the primary reason you came to live a human life.”

Sun in Service

With your Sun in Service, you have a deep understanding that life is a gift and that you are here to bring focus and form to the gift. You can DO a lot or you can BE. Either way, you are serving life by being alive. Train your mind to remember that each time you enter a room or a circumstance, you alter it. You bring a very sacred energy into that room by being life's most dedicated servant. If you do this, you will continue to fall more and more in love with life everyday, and the benefits will be unspeakable.

Sun in MOVEMENT

With your Sun in the principal of Movement, you came into this incarnation to do some powerful work on behalf of the human soul. Movement is the highest of the principles, the most galactic, the most subtle. You are here to bring the frequency of soul into form. You are a dancer of life, a choreographer of energy, a person who knows how to animate the densest of ideas/materials/systems. You work with the avatars—the ascended masters—or they work with and through you—to help you bring your gifts to the planet. With your Sun in Movement, enlightenment and awakening are entirely within your grasp.

Sun in Gratitude

With your Sun in Gratitude, we know that you are primarily here to offer Eckhart's most sacred prayer: "Thank You." You live your life constantly aware that life is a gift. You never forget that the gift must be used well—or it will use you. You can see the connections in all aspects of life, and this makes you take a deeper level of responsibility or accountability than most people. You the law of cause and effect on a bone-deep level; therefore, you are always alert to what effect you may be causing. You have a deep respect for all beings. Your commitment to life makes you easy to live with and lovely to have as a friend.

Sun in Goodness

With your Sun in Goodness, we know that your life is a very specific walk with God/goddess. Your every step is intentional, just like an animal's. You do not meander. You always keep your senses alert for the signals so that your next step can be equally intentional. Any error on your life journey is perceived immediately and corrected. Your primary motivation for life is to be a walking prayer. You are more interested in your walk than in results.

Sun in Gratitude

With your Sun in Gratitude, we know that you are primarily here to offer Eckhart's most sacred prayer: "Thank You." You live your life constantly aware that life is a gift. You never forget that the gift must be used well—or it will use you. You can see the connections in all aspects of life, and this makes you take a deeper level of responsibility or accountability than most people. You follow the law of cause and effect on a bone-deep level; therefore, you are always alert to what effect you may be causing. You have a deep respect for all beings. Your commitment to life makes you easy to live with and lovely to have as a friend.

Sun in Love

Your primary reason for taking this incarnation is to learn, understand, and practice the principle of Love. This is quite a challenge, because it essentially says that you are walking a relatively untrodden path. In our New Age, we are changing the old paradigms—one of which has been the path of violence, hatred, separation and war. You are one of the beings who has pledged to face those aspects of yourself, transform them, and become a vessel through which Love can embody. You are a lover—in the most mystical sense of the word—and your only real quest in this entire incarnation is reuniting with the Beloved.

Sun in Focus

With your Su in Focus, we know that your primary reason for incarnating this time is to play with perception. You came here to bring the gift of perception to form, and yet you are challenged to remember to change perception often so that you will not get stuck in a groove of simply seeing things according to a socially agreed norm. You have the marvelous skill that metaphysics calls "one pointedness." This means that you can eliminate all interference in order to give full attention to one detail. As a result, you are a great manifester. This lifetime is about learning to mature the ability to focus so that you can give the species the gift of perspective.

Sun in Awareness

With your Sun in Awareness, we know that your primary job is to expand your consciousness. As you do this, you, of course, expand the consciousness of all your soul cluster and that impacts the consciousness of the whole species. At first, depending on the wisdom of your parents and teachers, it may be very confusing for you. Yours is a life full of paradox! Your challenge is to keep growing spiritually so that you can encompass those paradoxes rather than be paralyzed or tossed around by them. However, that very growth may feel diffusing and disorienting. As you mature, you will find your stability. Like the sunbeam that makes every leaf "more green" when it strikes it, you are the kind of being who makes everything you encounter more clear and encourages everyone you meet to be more authentic.

Sun in Flowering

With your Sun in Flowering, we know that the main purpose of your incarnation is evolution. You took this incarnation in order to evolve yourself and the species. What does it mean to evolve yourself? It means that you will never stop weeding your own garden of separatist thoughts and ideas. You will never stop seeking more complex and simultaneously more direct ways to communicate and create. Your energy is dedicated not only to survival but also to wisdom and success.

Sun in Harmony

With your Sun in Harmony, we know that your primary reason for taking this incarnation is to work with multiple dimensions of consciousness. You took a vow to see the unseen, be the spokesperson for the unspeakable, and bring attention to the invisible energies from which all form erupts. Life may have seemed very strange to you in your formative years, because you were not “normal.” Like the jazz musician who hears the not-tune, you never quite “got” the norm. Unless you were born with full memory, it may have taken you a while—30 or 40 years—to realize that your life imperative is to be something other than the norm. Hopefully, by now you are comfortable with your beingness. You probably are or you would not be reading this book.

Sun in Memory

Your Sun in Memory tells us that your primary reason for incarnation is to remember—re-member. You have a unique ability to access the most ancient records, and you hold an anchor point in human consciousness that allows evolution to include all that has come before and surpass it. Your special gift is that you can communicate with Earth's angels—nature spirits—the devas—"kontumble," as Malidoma Some calls them. You have a tremendous access to the history of Life by communicating with the stones; therefore, your life is a contributing editor to the New Creation Story! Whether you are conscious of this ability to remember, it is still there in the energy field around you!

Sun in Reciprocity

With your Sun in Reciprocity, you are a natural peacemaker because you understand the laws of karma. You know that while nothing is innately “good” or “bad,” every thought, word, and deed creates its own balancing counterpoint. When one makes choices based on thorough knowledge of the Great Fore of Equilibrium (Reciprocity), then healing, wholeness, balance, and harmony are the inevitable results. Relationship is important to you, and creating balance within relationship is your “career.” You will be a great arbitrator or a diplomat.

Sun in Goodness

With your Sun in Goodness, we know that your life is a very specific walk with God/goddess. Your every step is intentional, just like an animal's. You do not meander. You always keep your senses alert for the signals so that your next step can be equally intentional. Any error on your life journey is perceived immediately and corrected. Your primary motivation for life is to be a walking prayer. You are more interested in your walk than in results.

Sun in Dreaming

Your Sun in Dreaming tells us that you have come to this lifetime to help create a new world. It is the job of the dreamers to reach into the realm of potential—the dimension of truth—and magnetize into form that which is ready to manifest. You came into this incarnation as an emissary for your soul as a dreamer. You take responsibility for all your realities, because you know the multidimensional nature of your being. The book: [The Woman's Book of Dreams](#), will be a very helpful source of support for you.

Sun in Love

Your primary reason for taking this incarnation is to learn, understand, and practice the principle of Love. This is quite a challenge, because it essentially says that you are walking a relatively untrodden path. In our New Age, we are changing the old paradigms—one of which has been the path of violence, hatred, separation and war. You are one of the beings who has pledged to face those aspects of yourself, transform them, and become a vessel through which Love can embody. You are a lover—in the most mystical sense of the word—and your only real quest in this entire incarnation is reuniting with the Beloved.

Sun in Creativity

With your Sun in Creativity, we know your primary reason for incarnating is to “work” the creative principle. In other words, you are constantly looking for ways to put ideas, actions, and people together in ways that have not been tried before. You are fascinated with the choreography of energy, and you love to try to make things work in new, delightful, and unusual ways—ways that have completely unique results. You are driven to find the most beneficial ways to express your life force. You work with Creativity for your own sake, but you also are anchoring this principle for an unknown circle of people—your soul cluster. You have a vague sense that when you come up with a truly original idea or plan, it ripples out and affects a large number of people!

Sun in Goodness

With your Sun in Goodness, we know that your life is a very specific walk with God/goddess. Your every step is intentional, just like an animal's. You do not meander. You always keep your senses alert for the signals so that your next step can be equally intentional. Any error on your life journey is perceived immediately and corrected. Your primary motivation for life is to be a walking prayer. You are more interested in your walk than in results.

Sun in Intelligence

Your Sun in Intelligence tells us that you are an agent of change. You are very interested in interfacing all kinds of energies so that a beneficial transformation takes place. This transformation can be in terms of developing your own potential as a being, or it can be in establishing a balance in the community, or it can be in the arrangement of objects in your home. You are a natural choreographer of energy—an architect of the design of form. You love to see things come together so that they are right! One warning: You may stand in the way of your own Higher Self by being sure you know what is right without consulting higher source.

Drop into your Soul...

Connect with the Divine
Sophia...

What does she have to
share with you about your
reason for incarnating?

What is her take on what
you are bringing to the
planet and why?

...but to bring this dream to fruition
you must first step out of the
shadows and take the risk of being
different (not just different from
others, different from what has
been.)

Indifference is an energy field that
gets you to focus your precious time
and life force on the
inessential...and be indifferent to
the things in life that really matter.
